Freedom of movement and the user's posture are critical points of office health. A poorly designed chair will result in poor posture which causes musculoskeletal ailments which in turn increases absenteeism rates. That is why a well designed chair will not only ensure that the user maintains proper posture but also alleviate some of the pain for those who are already affected. With our latest seating solution, BODY 2.0, we have your back.

Old expectations of a chair can finally be replaced by modern design and enhanced comfort. Instead of the traditional big, boxy and bulky designs from the past, Benithem has thrown away that norm and come up with a newer, sleeker and more comfortable design which is aesthetically pleasing as well.

With BODY 2.0, freedom of the movement and proper posture are a given. You can rest assure that through our numerous research and development processes, we will only provide the best for you, BODY 2.0.

CHOICE LOCKERS SERIES

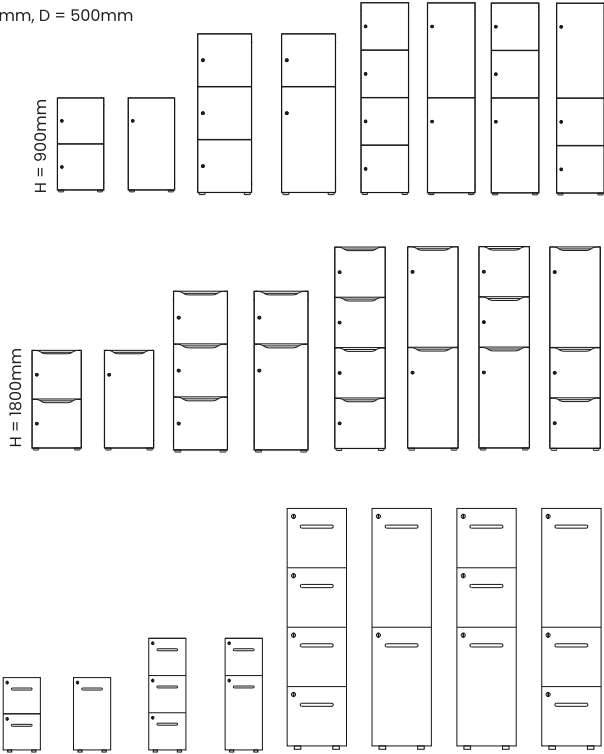

Hot desking and activity-based work concept are becoming increasingly relevant in modern offices. For this reason, more shared-desk workplaces emerge and create the need for a space to keep personal things. This makes practical lockers and essential element in offices and collaborative spaces, ensuring a sense of security and overall order while promoting a positive work environment for both employees and office visitors.

The **CHOICE** modular lockers are a versatile solution for the secure storage of personal and office items, temporary or all-day use. Both mobile employees and those with a permanent workplace as well as office visitors will appreciate this storage solution. The locker cabinets can be used in a variety of office spaces and are particularly suitable near workplaces, in reception areas and corridors.

CAFE SERIES MIX & MATCH

CREATE YOUR OWN TABLE

Put your imagination to the mix-and-match fun with a wide selection of tabletops and table legs. The wide variety of colours, shapes, materials and sizes of tabletops provide solutions for impressive dining environment, thanks to the ease of combination and long-lasting characteristics of material.

POCELAIN TOP (37MM)

Porcelain tiles have an extremely low level of water absorption and are perfect for spaces that occasionally get damp. They are harder, stronger, and more durable than any natural stone - even granite and have superior chip resistance. Porcelain tiles are among the most hygienic building materials, completely free of moisture and inhospitable for the growth of bacteria of all kinds. With no surface glaze to wear through, the tile's appearance will stay the same for the life of the tile.
